

PORTFOLIO

PRINCE PARMAR

MOBILE APP DEVELOPERS

ABOUT ME

I am a passionate and experienced mobile app developer with a keen eye for UI/UX design. With 2 Years + of experience in the field, I have successfully delivered numerous projects and collaborated with a diverse range of clients.

Education: Bachelor of Computer Applications

Experience: 2 Years +

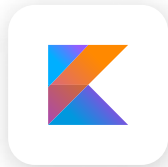

Skills:

Flutter

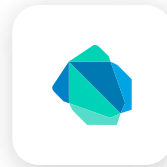

Android

Kotlin

Firebase

Dart

Java

SERVICES

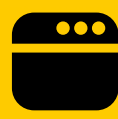

UI/UX DESIGN

Crafting intuitive and visually appealing interfaces to enhance user experience.

MOBILE APP DEVELOPMENT

Building high-quality, scalable mobile applications for iOS and Android platforms.

WEB DEVELOPMENT

Developing responsive and dynamic web applications tailored to your needs.

WORKFLOW

Planning:

Understanding client requirements and defining project goals.

Research:

Conducting market research and competitor analysis.

Design:

Creating wireframes and prototypes to visualize the app's structure and flow.

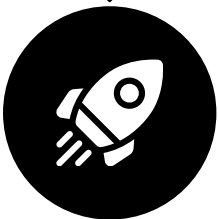

Development:

Writing clean, efficient code using the latest technologies and frameworks.

QA Testing:

Rigorous testing to ensure the app is bug-free and meets quality standards.

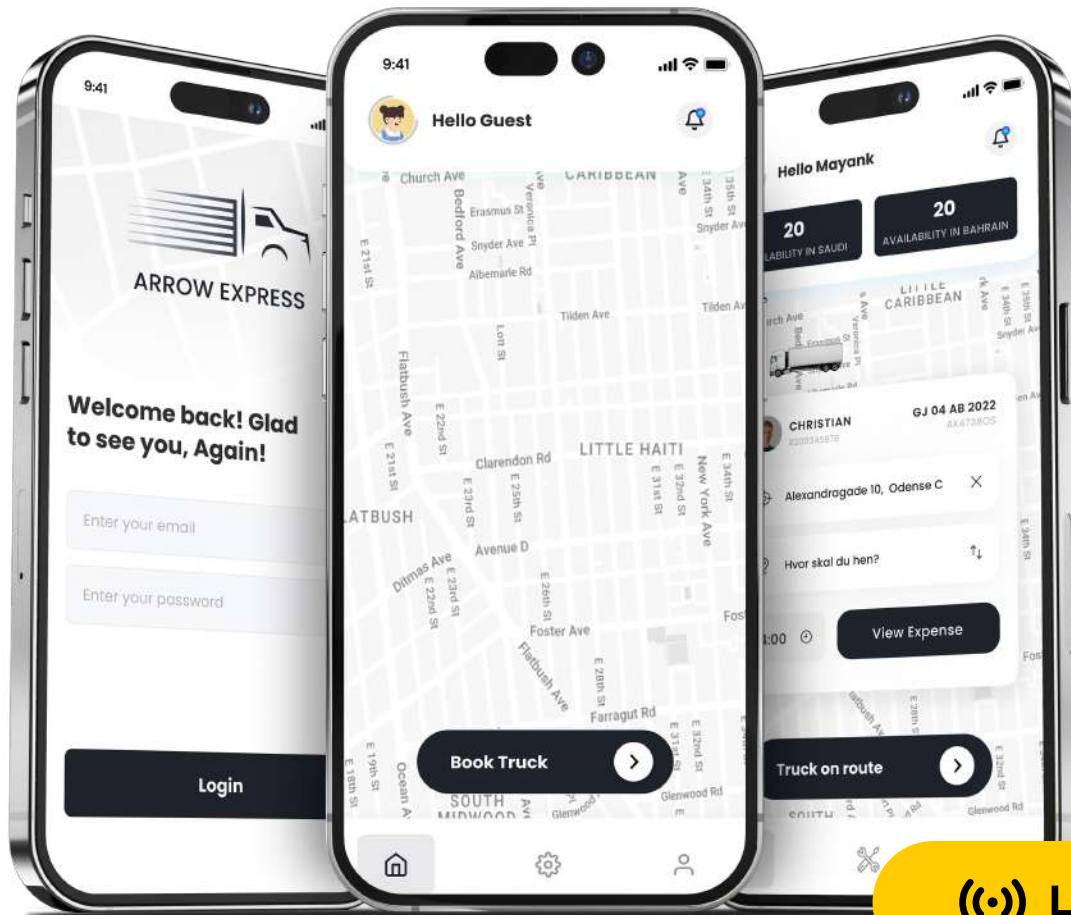

Launch:

Deploying the app to the App Store and Google Play Store, and providing post-launch support.

WORK PORTFOLIO

Project Name:

Arrow Express

Industry:

Booking App

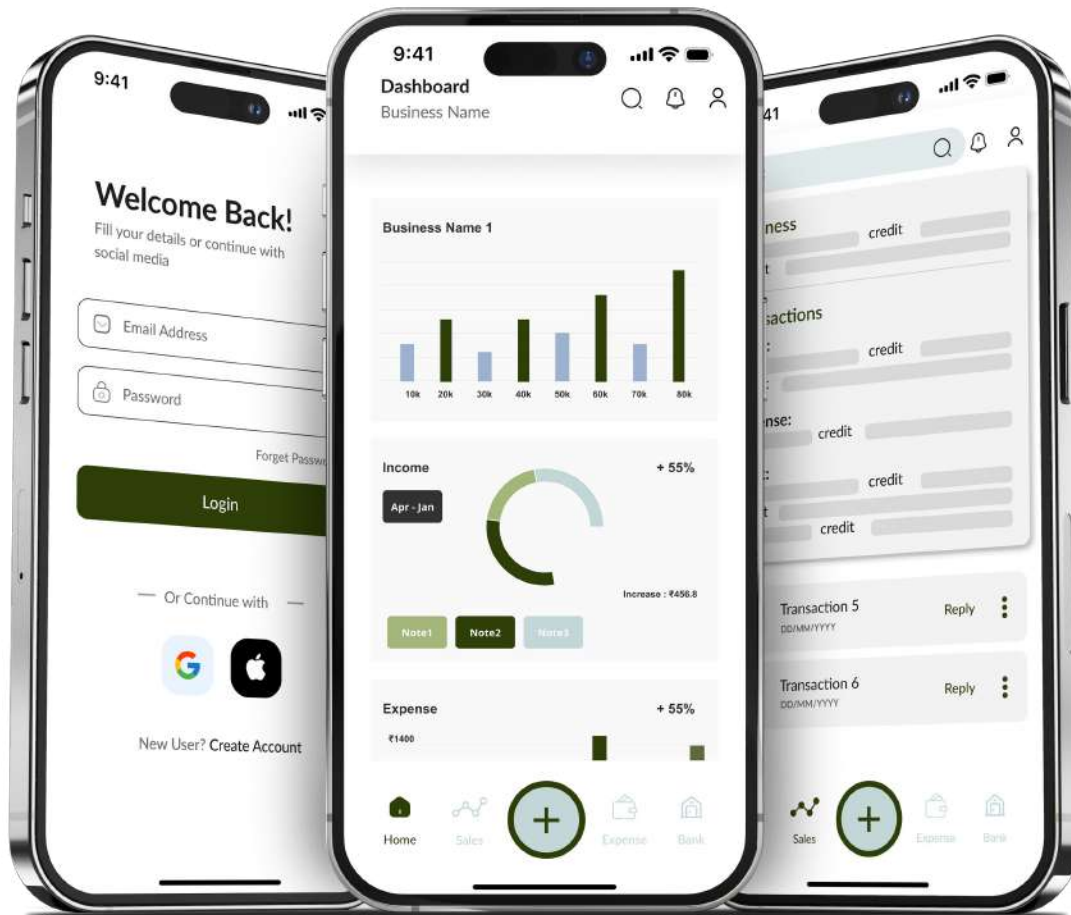

Key Features:

- Real-Time Driver Updates
- Trip Progress Monitoring
- Driver Management
- Comprehensive Data Insights
- User-Friendly Interface
- Efficiency Enhancement
- Streamlined Operations
- Downloadable Admin App

Description:

Experience unmatched control with the Arrow express App. Gain real-time insights into driver updates and trip progress, putting you in the driver's seat of your fleet's operations. Seamlessly manage and make informed decisions – approve or reject driver vacations with ease. Delve into comprehensive driver expense and maintenance history to optimize resource allocation. Our user-friendly interface empowers you to lead with confidence, enhancing efficiency and communication. Revolutionize your fleet management today – download the Arrow Express Admin App and take charge of streamlined operations like never before.

PROJECT 02

Project Name:

Accomation

Industry:

Booking App

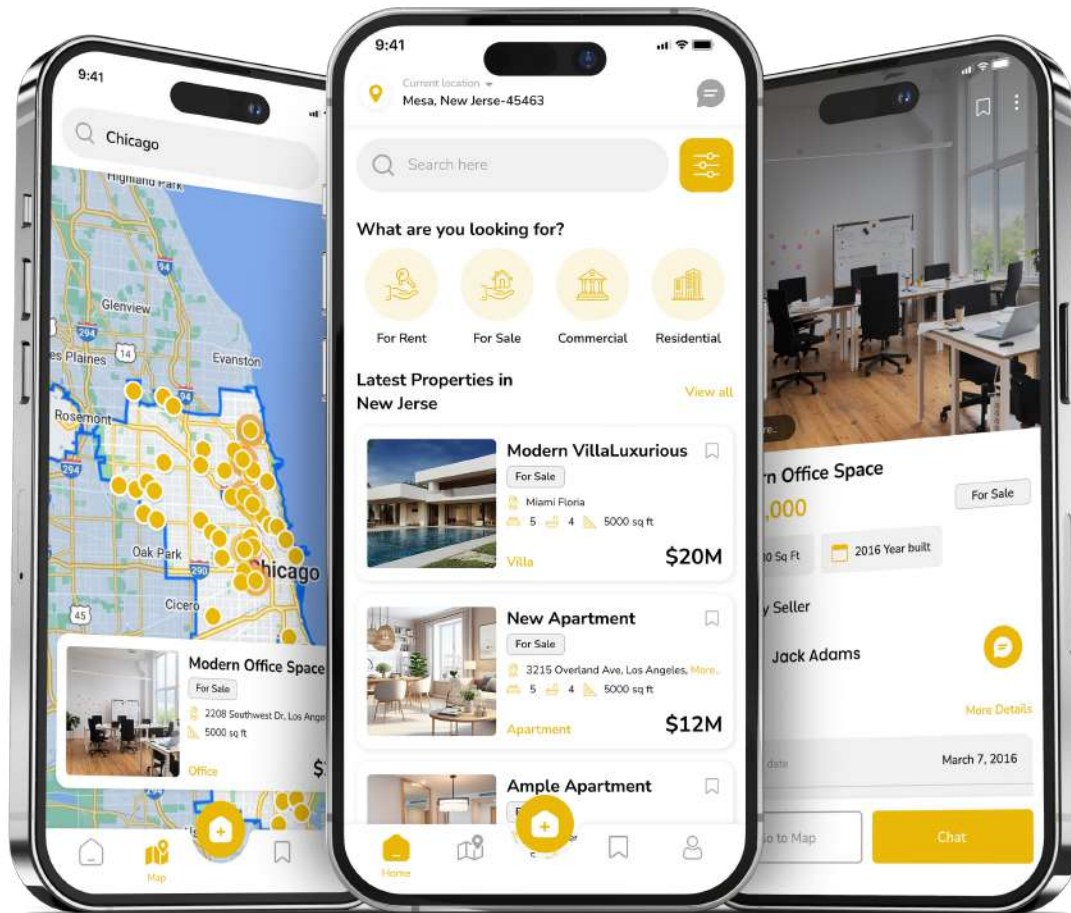

Key Features:

- Invoice Management
- Expense Management
- Banking Activities
- Admin Communication
- Real-Time Notifications
- Graphical Data Representation

Description:

This project offers various functionalities such as managing invoices, expenses, and banking activities. Additionally, it includes a chat feature for communication with the admin. Users can update and add invoices through the application, and they receive real-time notifications along with graphical representations of data.

PROJECT 03

Project Name:

Puinnacle

Industry:

Real Estate

Key Features:

- Invoice Management
- Expense Management
- Banking Activities
- Admin Communication
- Real-Time Notifications
- Graphical Data Representation

Description:

We've developed a real-time real estate project where users can view properties in real-time. Additionally, we've created an admin panel app where administrators can monitor users' carts in real-time as they add products. We've also integrated a payment gateway and checkout feature for seamless transactions.

PROJECT 04

Project Name:

Grocery Store App

Industry:

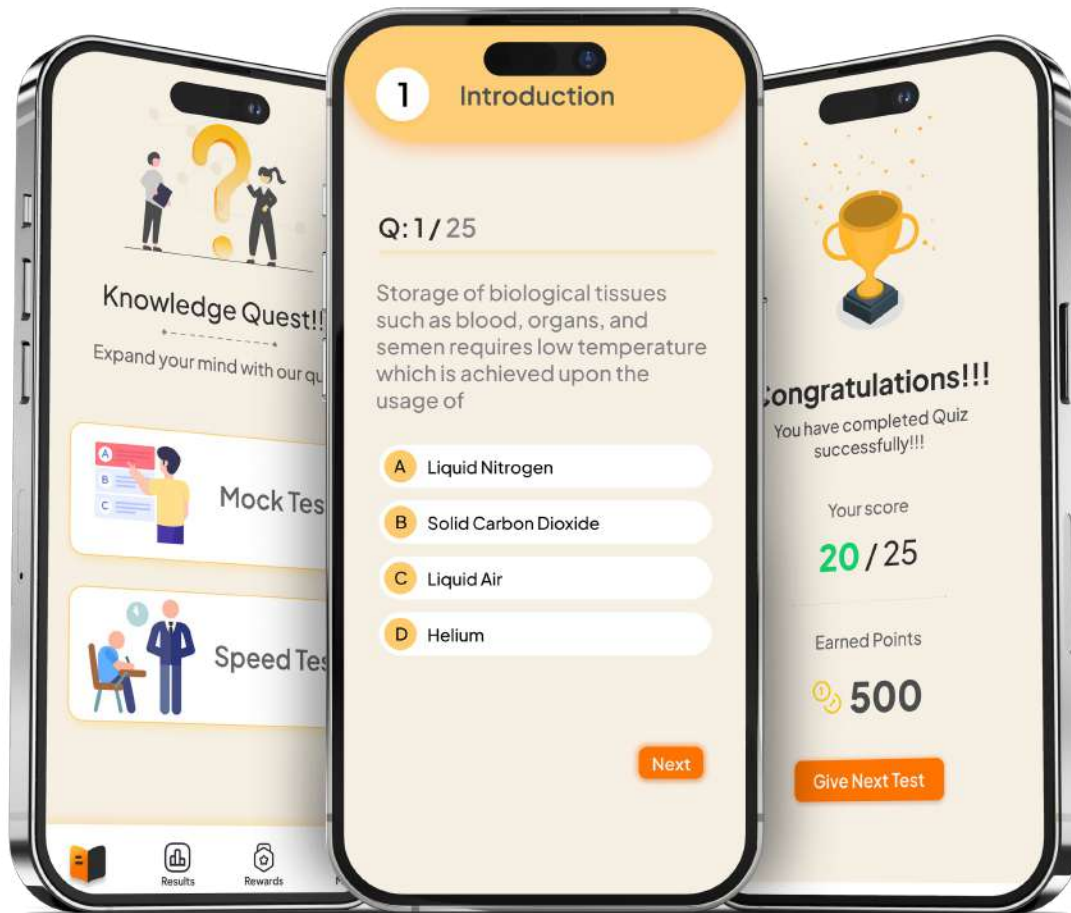

Grocery Delivery

Key Features:

- Checkout System
- Cart Management
- Stripe Payment Gateway Integration
- Address Management
- Fully Functional Delivery App
- Admin Panel

Description:

I've successfully developed a comprehensive grocery app that includes essential features such as a checkout system, cart management, integration with the Stripe payment gateway, address management, and a fully functional delivery app. Additionally, I've created an admin panel to efficiently manage the operations of the app.

**Project Name:**

BrainQ

Industry:

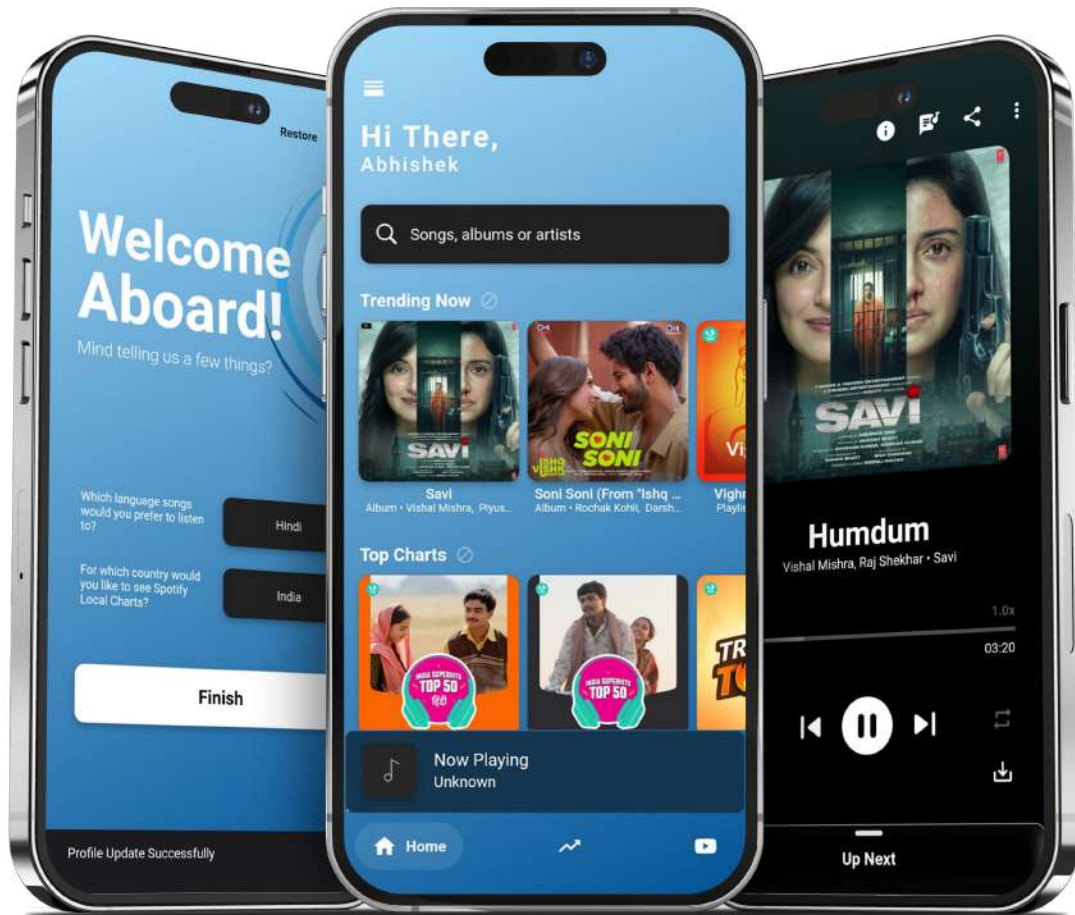

Educational Technology

Key Features:

- Play Quizzes to Earn Money
- Referral System
- Detailed Quiz Results
- Enhanced Functionality Modules
- User Engagement and Rewards

Description:

I've developed a quiz app that offers users the opportunity to play quizzes and earn money. Users can also refer their friends and colleagues to participate. The app provides detailed results after each quiz session, along with additional modules for enhanced functionality.

**Project Name:**

Sound Vibes

Industry:

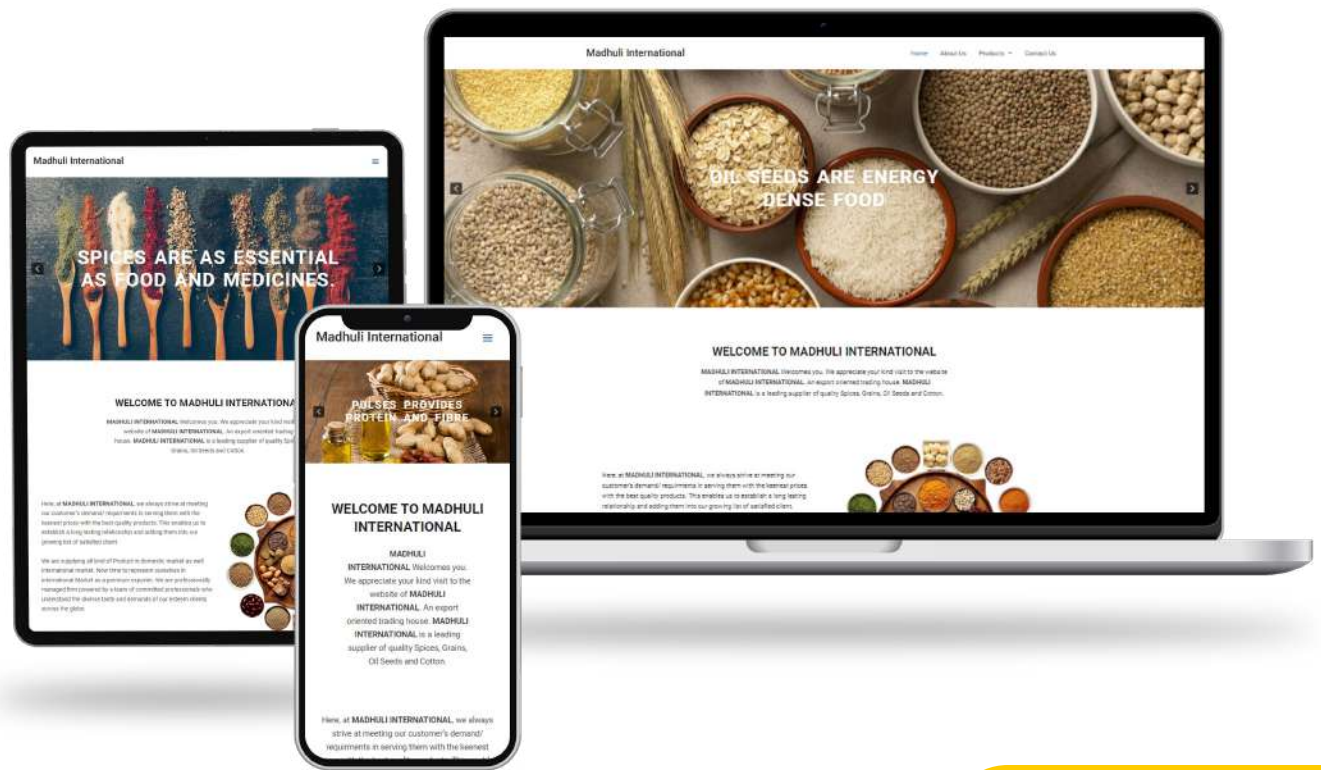

Music Streaming

Key Features:

- Integration with Multiple Streaming Services
- Theme Customization
- Background Playback
- Offline Listening
- Unified Music Library

Description:

I've been involved in developing a music player app that integrates JioSaavn, Spotify, and YouTube Music into a single platform. Additionally, the app offers multiple theme options for customization. Users can enjoy continuous playback of YouTube music in the background and have the capability to download all songs to external storage for offline listening.

[\(\(\)\) Live Demo](#)

Project Name:

Madhuliinternational Web

Industry:

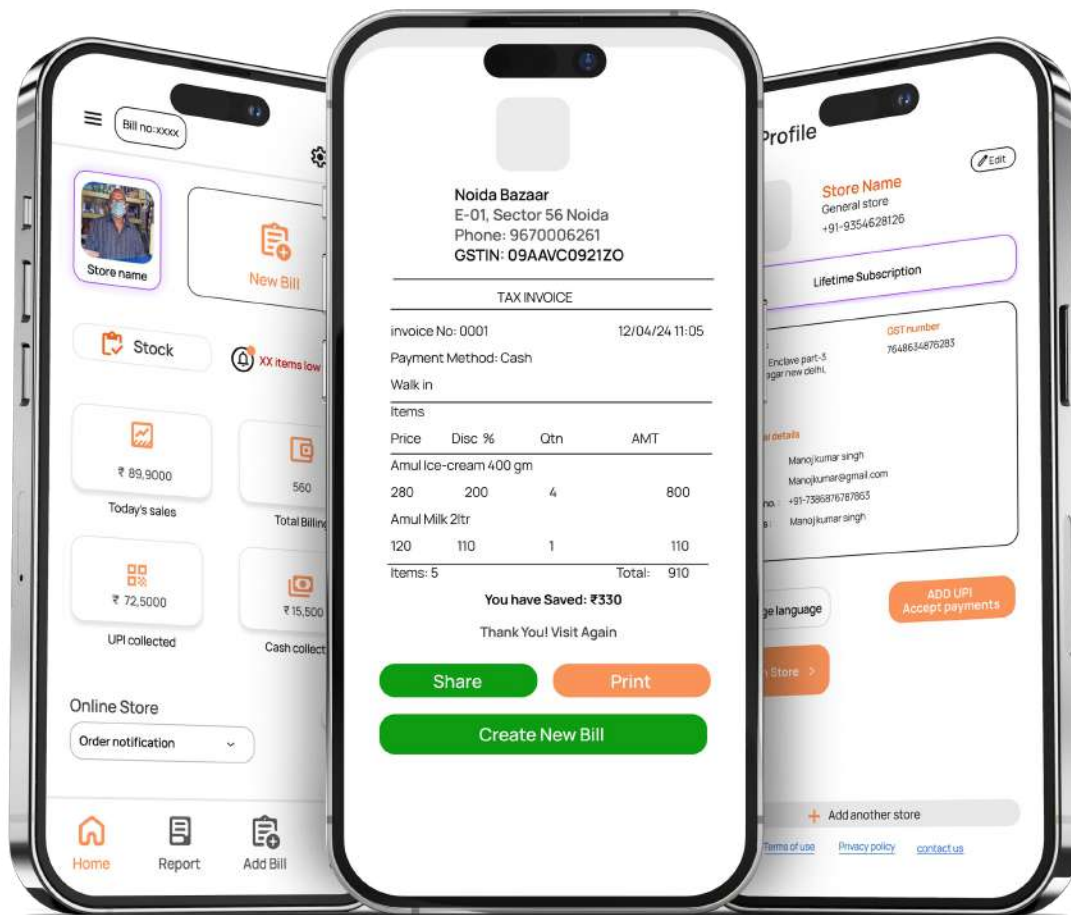

E-Commerce

Key Features:

- Organized Product Showcase
- User-Friendly Navigation
- Direct Admin Contact
- Enhanced Functionality Modules
- Comprehensive User Experience

Description:

I've created a business website for your client that showcases all products and categories in an organized manner. Users can easily navigate through the site to explore different offerings. Additionally, I've integrated a feature for users to contact the admin directly for inquiries or support. Various other modules have been implemented to enhance the functionality and user experience of the website.

Project Name:

BillPe

Industry:

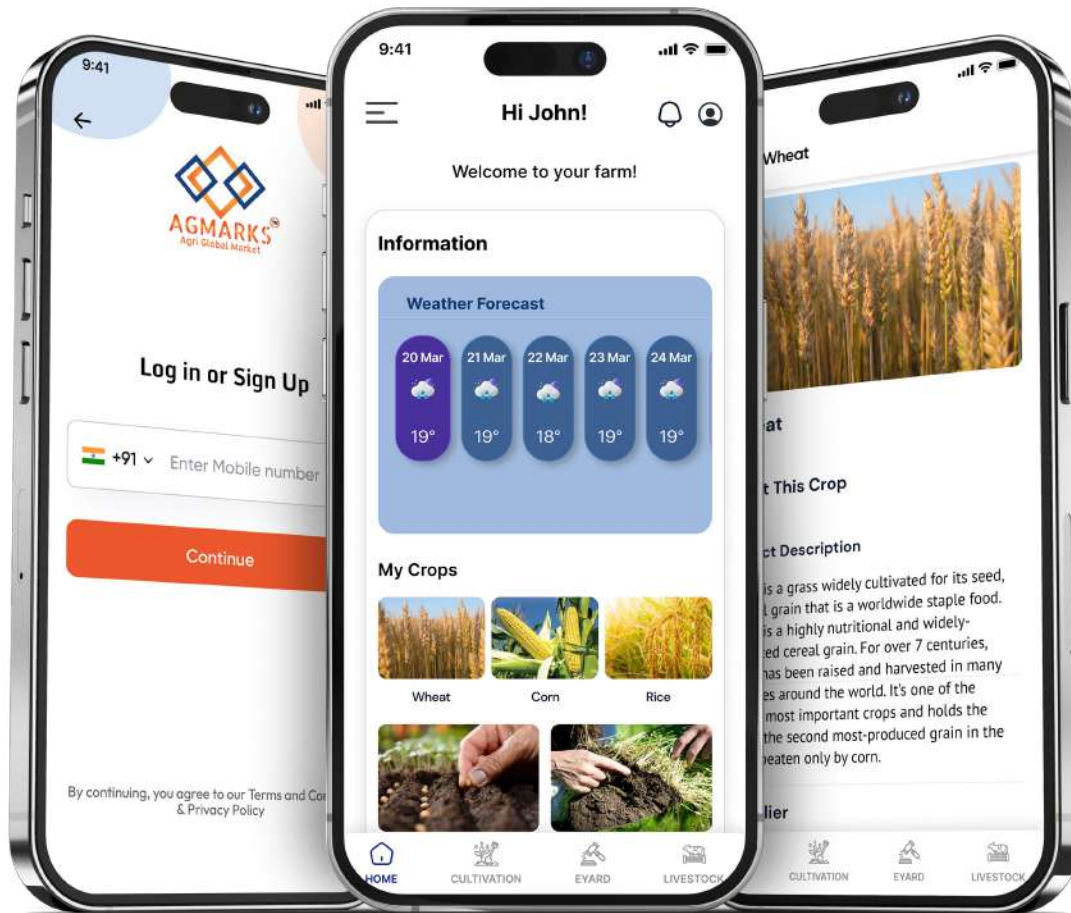

Financial Technology

Key Features:

- Print invoice
- Manage Store
- Easy to use for user

Description:

Our state-of-the-art billing application is designed to streamline the billing process for businesses of all sizes. This application is not just limited to single-store management; it also supports multiple stores, making it an ideal solution for businesses with multiple outlets. Additionally, the integration of the Cashfree payment gateway ensures seamless and secure transactions, enhancing the overall customer experience.

Project Name:

Agmarks Framer

Industry:

Agricultural Technology

Key Features:

- Farmer Friendly
- Multiple module in one app
- Manage auction and selling

Description:

The Farmer Management App is a comprehensive platform designed to revolutionize the agricultural industry by providing a centralized solution for managing farming activities, facilitating real-time auctions, and connecting various stakeholders including farmers, vendors, and suppliers. This app is crafted to enhance productivity, streamline operations, and foster a robust agricultural community through seamless interaction and data-driven decision-making.

THANK YOU

I APPRECIATE YOUR INTEREST IN MY WORK. YOUR FEEDBACK AND
